Working Papers

Task Assignment with Interdependent Incentives (September 2026), *Job Market Paper* with Allen Vong

Abstract: We study a manager's repeated assignment of a burden among a group of homogeneous workers under imperfect public monitoring of workers' effort. Their effort incentives are interdependent because assignment is exclusive. We develop recursive bounds on workers' assignment frequencies to address this interdependence and characterize the manager's optimum among equilibria inducing effort whenever assignment occurs. We also explicitly construct an equilibrium attaining this optimum. Whenever some effortful assignment is sustainable, this equilibrium retains the assignee after failure and relieves him after success until each other worker has produced a success and a vacancy phase has elapsed. Our results extend to assignment of a desirable task.

Moral Hazard and Operation License Transfers (June 2026)

Abstract: A competitive market of long-lived agents holds tradable operation licenses serving a sequence of short-lived principals. I highlight the role of the operation license transfer market in addressing the binding moral hazard problem under strict market conditions, namely, to motivate agents to invest in quality provision when there is no competition among potential owners for licenses. I show that, agents can either sell their licenses at a higher price or extract higher profits from principals, and short-selling a failing business at a break-even price is a "robust" phenomenon in efficient equilibria. However, once the no-competition requirement is relaxed, the efficient equilibrium collapses.

Teaching and Research Experience

<u>Experimental Economics Laboratory</u>	2025
Research assistant, with Prof. Lawrence Choo (University of Macau)	
<u>Math Camp for Econ PhD Students</u>	2024
Instructor (University of Macau)	
Teaching Evaluation Score: 5.44 / 6	

<u>Economics of Information</u>	2025
Teaching assistant, with Prof. Lawrence Choo (University of Macau)	
<u>Advanced Topics in Microeconomics</u>	2023, 2024
Teaching assistant, with Prof. Guangzhen Sun (University of Macau)	
<u>Microeconomic Theory</u>	2023, 2024
Teaching assistant, with Prof. Guangzhen Sun (University of Macau)	
<u>Intermediate Microeconomics II</u>	2023, 2024
Teaching assistant, with Prof. Guangzhen Sun (University of Macau)	
<u>Public Economics</u>	2023
Teaching assistant, with Prof. Guangzhen Sun (University of Macau)	
<u>Statistics I</u>	2022
Teaching assistant, with Prof. Mingli Zheng (University of Macau)	
<u>Economics of Everyday Life</u>	2022
Teaching assistant, with Prof. Mingli Zheng (University of Macau)	

Fellowships, Honors and Awards

UM PhD Assistantship (University of Macau)	2022-2026
Luso International Bank Scholarship	2020

Software

LaTeX, Python, Mathematica, Stata

Languages

Mandarin (native), English (fluent)
